FINAL YEAR PROJECT DETAILS- (ACY 2025-26)

SECTION NO:1

BATCH NO-11

PROJECT TITLE: Stock Market Analysis and Visualization using Data Science Tools

ABSTRACT:

The stock market generates massive volumes of financial data daily, which can be leveraged to understand market trends, predict stock movements, and support informed investment decisions. This project focuses on analyzing historical stock data using data science tools and techniques. Various statistical and machine learning models are applied to identify patterns, trends, and correlations within stock prices. The data is then visualized through interactive dashboards and graphical representations, enabling clear and insightful interpretation. The outcome of this project will help investors and researchers gain actionable insights into market behavior and decision-making strategies.

Keywords:

Stock Market Analysis, Data Science, Machine Learning, Predictive Analytics, Time Series Forecasting, Data Visualization, Python Programming, Financial Data, Pandas & NumPy, Matplotlib & Seaborn, Interactive Dashboards
